

DNN Discussion

講者：Isaac

► Why DNN Fail in early day

Why DNN Fail in early day

- ▶ Some issue that make DNN fail in early day
 - ▶ Hardware issue
 - ▶ Doesn't have fast enough GPU like today
 - ▶ Data issue
 - ▶ Hard to collect large amount of data
 - ▶ Activation Function
 - ▶ Use sigmoid as activation function

Activation Function

- ▶ Give NN nonlinearity property
- ▶ Can be regarded as "ON" (1) or "OFF" (0)

$$y = f(x) = \sigma(W^L \dots \sigma(W^2 \sigma(W^1 X + b^1) + b^2) \dots + b^L)$$

Backpropagation

Backpropagation = many multiplication of derivative activation function

Sigmoid Function

- ▶ Maximum of slope is $\frac{1}{4}$

$$f(x) = \frac{1}{1 + e^{-x}}$$

RELU

- ▶ slope is
 - ▶ 1 when $x \geq 0$
 - ▶ 0 when $x < 0$

$$y = \begin{cases} x & \text{if } x \geq 0 \\ 0 & \text{if } x < 0 \end{cases}$$

Gradient vanishing illustration
